

## Cangrelor

**Percutaneous coronary intervention (PCI):** IV: 30 mcg/kg bolus prior to PCI followed immediately by an infusion of 4 mcg/kg/minute continued for at least 2 hours or for the duration of the PCI, whichever is longer.

### ***Transitioning patients to oral P2Y<sub>12</sub> antagonist therapy after PCI:***

*Conversion to clopidogrel:* Administer 600 mg of clopidogrel immediately after discontinuing cangrelor infusion. Do not administer clopidogrel prior to cangrelor discontinuation.

*Conversion to prasugrel:* Administer 60 mg of prasugrel immediately after discontinuing cangrelor infusion. Do not administer prasugrel prior to cangrelor discontinuation.

*Conversion to ticagrelor:* Administer 180 mg of ticagrelor at any time during cangrelor infusion or immediately after discontinuing cangrelor infusion.

**Bridging therapy prior to cardiac surgery (off-label use):** IV: 0.75 mcg/kg/min (without a bolus dose) following thienopyridine discontinuation for up to 7 days prior to surgery; discontinue 1 to 6 hours prior to surgical incision.
